DETAILED ACTION

Response to Amendment

1. Claims 1-32 are pending. Claims 1-14 and 28-32 are still withdrawn from consideration. The previous rejections is withdrawn pursuant to Applicant's November 25, 2005 Amendment and REMARKS.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 15-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The phrase "presenting to a particular approver. . . . in said particular purchasing requisition" does not have support in the original specification. Clarification and support therefore is required or the offending language must be removed.

Claim Rejections - 35 USC § 103

4. Claims 15-27, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Gardner et al., US 5,758,327.

Gardner discloses a central computer system, e.g. 10, connected to a distribution provider, e.g. 34, and vendors, e.g. 24, 26, 28 for providing purchasing requests from a workflow catalog database, comprising an electronic purchasing approval/disapproval system comprising a process, e.g. 56, having a line item approval module where at least one approver, e.g. a requestor, approves, e.g. cols. 3-4, line vetoes, only items identified as being fit to be approved. It is noted that, as understood, Gardner comprises a particular approver.

Gardner does not disclose the term process manager nor a graph. However, Official Notice is taken that process managers in data application comprising graph functions have been common knowledge in the computer database art, as is electronic mail delivery. To have provided such for Gardner would have been obvious to one of ordinary skill in the art. Applicant's REMARKS have been reviewed, but are moot in light of the new grounds of rejection.

5. Further pertinent references of interest are noted on the attached PTO-892.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
